

**NGK EUROPE GMBH**

## Your skills. Our skills. Together we can do more.

Over 140 employees from 20 nations. Highest technical competence. The chance to help shape the future – and this in the heart of the Rhine-Main region: Welcome to NGK Europe!

All well-known European vehicle manufacturers rely on NGK as one of the leading manufacturers of technical ceramics for the automotive industry. In accordance with our corporate philosophy "Enriching Human Life by Adding New Value to Society", we, as a subsidiary of the Japanese NGK Insulators Ltd., are responsible for the distribution of unique ceramic technologies that enable our customers to meet demanding emission standards. In doing so, we set standards on the market. We would like to work together with you! Join our friendly team, take on responsibility and become a sought-after contact person for our customers! Start the fine-tuning of your career as a

## (Junior) Technical Account Manager (f/m/d) Electronic Components

### Your tasks:

Your job will be to take care of European companies around the topic of power semiconductors for electrified automotive and industrial applications, and to build up a trustworthy and long-lasting customer relation. Your tasks in detail:

- It's your passion to work with customer teams to deliver highest technical, quality and commercial solutions to help maintaining and growing a profitable business.
- You are the contact person for the European customer as well as for our Japanese headquarters, with whom you work on specific quality topics.
- Agreement with suppliers in the supply chain to ensure that the proposed solutions are effectively managed and include appropriate technologies.
- During fairs, you will be responsible for the coordination during and prior to the event and for all technical questions coming from the customer.
- You will always be aware of the market to analyze future trends and create strategic and long-term plans / forecasts to secure future business.

### Your skills:

- Degree in mechanical engineering, material science and engineering, electrical engineering, chemistry or similar studies
- First working experience in the automotive sector, especially in the field of ceramic electronic products is an advantage
- Technical and commercial knowledge about ceramic electronic products; Initial knowledge of the promotion and generation of business opportunities for ceramic electronic products is an advantage
- Fluent in English and good knowledge in German as well as confident in handling our business partners all over Europe
- Business trips are no problem for you as well as using MS Office
- Convincing, open and communicative personality, who loves to take responsibility and keeps calm in challenging times as well as someone who loves to be part of an international team

An attractive compensation package, a secure job, a thoroughly international environment and yet a family atmosphere: all this is included in your job at NGK Europe as well as a good work-life balance and numerous development opportunities.
